you make one purchase, you will always deal at the People? Cash Store,

\$25,000 Worth of HOLIDAY GOODS.

Seldom, if ever, has a merchant outside the large cities attempted to carry a line of holiday goods as we now have on display. Our aim is to be a "top notcher" and we progress while competition sleeps. Anything you buy of us in the hardware, tinware, woodenware or grocery line, etc., carries with it our personal guarantee that it is just what we represent it to be. We invite you to inspect our line of new holiday goods, is we know you will profit by your experience. Institute week we had a big surprise party at our store. Those who came were surprised at the prices for such a high grade of goods as we sell, and we must conless that the multitudes that were attracted to our store were even a surprise to ourselves. We are now ready to handle the army of holiday shoppers with courteons and accommodating clerks and will be glad to have you call when at the county seat whether you desire to buy or are only sight-seeing. Read below a few

In this department we hardly know where to begm m enumerating the goods here-and you wouldn't cither after you

Collees and Teas—In the sile of these goods we are full exceeding our most sanguine hopes. The coffee we sell runs into the thousands of pounds weekly and is making new friends daily. We have a brand of loose coffee-roasted and blended especially for us-that we are selling at 12c or two pounds for 236 It has a delicious tiste and supposes any 15e or 20e brand. We dso handle the fumous Scal Brand' Mocha and I wa and it is the strongest richest blackest coffee we know of

There are other good coffees of course and we have them. Our ters are the funous Ceylon Brand which garrantees then purity and flavor. We have Blud tip leaves. Tillin small leaves, Bungaloe large leaves. These are not mixtures or

blends of other countries. Also other timous brands Canned Goods-In this line we have almost everything that can be canned—that's a broad assertion, but our stock justihes it for camed compens sup homs-all cut into little pieces with nostrings, just tenderness and tisty goodness, apples and we do. You can't help being pleased So come for pies and damplings cored pied and put in gallon cans peaches and pears tomatoes with the flavor of a red-ripe midsummer vegetable and all the other good things put up in the Also sudmes, red and white salmon in hories—picked in way olives, the grint virities in full grint bot le the bizgest we ever saw. In fine table cuttery our stock is mexcelled. Only the best make of goods are for safe here and the prices are the lowest in the county. We have the prettnest and cheapest line of carrying sets ever exhibited in the Why use the old method when you can buy one of the latest improved to key and beef roasters at from 35c up. The culmary department is not complete without it. We put out hundreds of them in the past few wicks but just received another consignment and the stock is full for your realestion. A big barry in.

BICYCLES.

Experts on cycling declare that the winter season-when roads are frozen hard--is the best time to enjoy this exhibitating exercise. We want you to know that we will sell you a brand new bieyele---Ladies', for \$8, and Gent's, \$10 We have better ones and will sell the best for less then you can buy them in the cities. We have them in stock and they must go---hence the shughter in the price.

ALL SOILS BENEFITED BY A COVERING OR GROWING CROP--THE USE OF MA-NURES AND FERTILIZERS.

IMPROVING WITH GRASS.

Grass is one of nature's soil restorers, as the keeping of the land in grass for two or three years is, in a certain degree "rest" to the land. This is particularly the case on farms where grain is largely produced, as the grasses, being entirely disa milar in their food requirements, when compared with grain, draw from the soil foods that are not so strongly de manded by gime. A crop of clover sends its toots down into the subsoil while the side roots work hear the surface. Although clover is not really class ed da a "grass" crop, yet it is usually the custom to mention it with the grasses. The roots work into all portions of the ectl, and when the crop is harvested there is an incremens amount of roots left in the son to weday. When land is in grass for several years there arrives a time when the grasses grow state to the land and a challze to a grain crop will be ladvantageous. As some of the grasses appresent very near to the nature of cals, arely a, a wheat the preserence is given n clover because it is more opposite to grain crops in its characteristics. An advariage sometimes overlooked in the Chas. L. Pellis & Co. covering afforced the soil by grasses, as wed as the accumulation of dead leaves and decaying seems, which create in time a cark moid, from the carbon yielded by the decomposition of the vegetable subs inces, such decay being promoted by the deep snaming. Whenever grass takes reot it begins forming a mold under neath, which is termed Lumus, and wherever this exists it indicates that the soil has increased in tertility according to the amount of humans formed, earth worms, rains, trosts, air and warmth asstating in the process. This increase of fertility is due to the plants, the roots and the various causes mentioned.

No soil can be immediately changed by growing grass upon it unless the soil is in a fit condition for grass. If the and is too poor to produce grass it must to given some kind of treatment of preparation. It manure or artificial torn ir-is are applied there will be no callianty in sections a good sod if the season is tayorable, but an excellent wode is to sow some quick-growing crop, such as cow peas. Apply lime or the land after plowing the green cron under, and then sow to grass early the next spring. When once the land is established to gives the battle is won, as tie grass crop will prepare the land for armost any other ctop that may follow Finners who manure their fields for gia s are sometimes not as cautious in regard to the condition of the manure use has they alroad be, and the result is ar traces a crop of woods, owing to the dead weeds being forown on the manufi be to, that preserving the seeds. If all the dad me used is first completely decomposed the d filmity of weeds will be leavened. The test method is to his lime the land in the fall and then apply tertiages in the spring. No kind o stock should be allowed on a grass plo and the grass ons made considerable growth, nor stoud the land be pastured during wet weather while he grass a years, as transpling does much harm. war pear to at a said and be in order to harvest a surpor particle the stock, but to improve the band. After the first year the danage to harvesting or pasthing will not poss great. Good land. nowever, will support a cop and improve the soil at the same time. -

The eagle seemed predestined to reign, for he wroged los flight toward che sain, leaving all the other birds tar below. At last, when he could rise no higher, a wion, which had been higher, a wion, "took a fly above him a plese, and was crowned king of the algle and all, sir!"

Elforts have been made to frace the origin of the customary hunting of the wiven in heland. Those who do not be heve that it was copied from the Manx say that long ago a company of Irish troops was on the point of surprising and destroying a body of Danish, when a surprising and the latter trons slimber by pecking at some crumbs which lay strawn on a drain, remaining from the drain mer's hasty supper.
